Sound Capture

Noise pollution, sound and picture synchronization

GO DigiART
Common causes of unwanted noise

Refrigerator

Computer Server

If a bad noise can't be stopped then, perhaps, show the source of the noise in the film so that the viewer is no longer distracted by curiosity

Office lighting

Air conditioner

GO DigiART
Get microphone as close as possible…

☑ … but out of the shot!
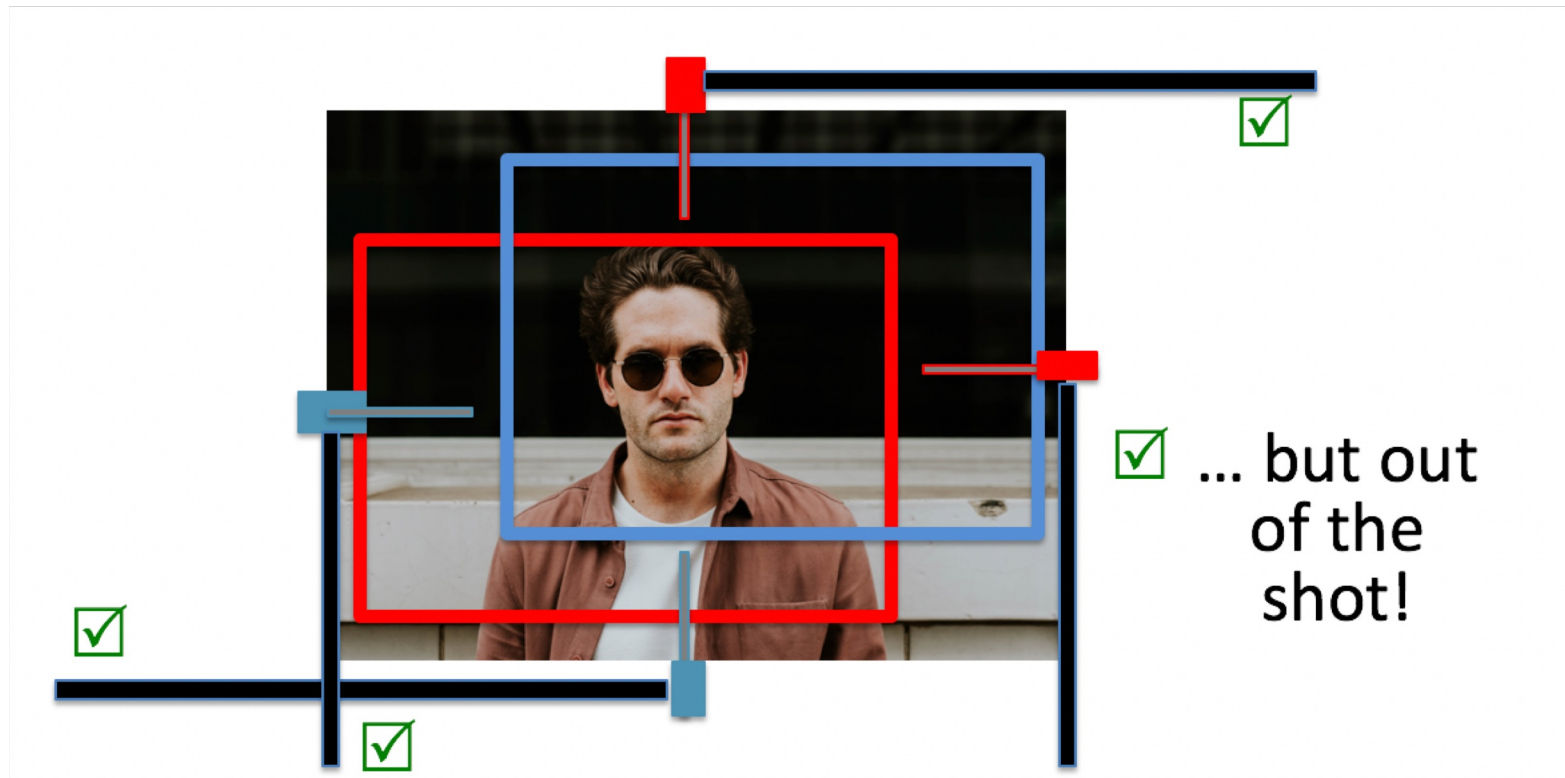

Sound and picture synchronisation

The clapping gives a visual 'moment' which you film
(the **sight** clapperboard closing)

If you don't have a clapperboard you can simply clap your hands, once, loudly

... and an audio moment which you record through your audio recorder
(the **noise** of the clapperboard)

The illustration shows sound on a timeline in the free sound editing software 'Audacity'

In editing, match the visual moment with the audio moment and your film's sound and picture will be synchronised.
